  Bachelor's degree, software engineer
  2022 - 2026

Ivan Tropanets
Front-end developer

Summary

I am a beginner front-end developer with knowledge of HTML, CSS and JavaScript. I am a fast learner, adaptive, responsive and always up for a challenge. I am always ready to communicate with the customer for the sake of a well-done project.

Projects

Airpods Max

Airpods Max is a responsive site that includes the ability to change the color of the headphones. The color change functionality is made using JavaScript.

Live page

GitHub

WebStudio

Also a siWeb Studio - I made this site while studying for the Fullstack Developer course from GoIt. This site has several pages, as well as modal window functionality for submitting an order. The site also has an adaptive design.te with adaptive layout and functionality made using JS.

Live page

GitHub

Focus Frame

Focus Frame is a team project in which I participated and was involved in the Hero section. The site has a responsive design and a registration page.

GitHub

Food Boutique

Food Boutique - this site is also a team project in which I took part. The site itself is a grocery store. In this project I created the Header section along with its responsive design. I also helped with creating a modal window and other little things.
